PROFILE

Microsoft Dynamics NAV and Dynamics 365 Business Central technical consultant with four years of hands-on ERP delivery for international retail, hospitality and duty-free clients. Specialized in AL and C/AL development, large-scale NAV-to-Business Central upgrades (Navision 2009 R2 and NAV 2016 through to BC 23–28), extension and report development, and C#/.NET middleware that connects Business Central to e-commerce platforms, LS Central POS and EFT payment hardware. Combines deep platform knowledge with direct client communication across analysis, development, go-live and post-implementation support, with a consistent focus on data integrity, minimal downtime and long-term system reliability.

CORE TECHNICAL SKILLS

Microsoft Dynamics	Dynamics 365 Business Central (v23–v28), Microsoft Dynamics NAV, Navision 2009 R2 / NAV 2016, AL language development, C/AL development, extension development, RDLC & Word report development, web services, upgrade & data migration, performance optimization
Retail & POS	LS Central POS customization, LS Commerce, AL control add-ins, PAX A35 EFT terminal integration, DLL-based EFT device communication, payment transaction processing
Backend & Integration	C#, .NET, DLL development, .NET middleware services, REST & SOAP services, API integration, Business Central–Magento and Business Central–WordPress integrations, third-party system integration
Databases	Microsoft SQL Server, SQL, database management, query and data-handling optimization, data migration
Web & Application	JavaScript, HTML5, CSS, responsive web development, full-stack .NET web applications
Additional Languages	Python, C, C++
Tools & Practices	Azure DevOps, Git, GitLab, technical troubleshooting, go-live and post-implementation support, client-facing requirement analysis

PROFESSIONAL EXPERIENCE

Technical Consultant

Aug 2023 – Present

Voyager Pvt. Ltd. / EBT Middle East LLC

- Deliver end-to-end ERP upgrade and migration projects across Microsoft Dynamics NAV and Dynamics 365 Business Central for international retail, hospitality and duty-free clients, covering data preparation, custom AL and C/AL development, testing and go-live support.

- Designed and developed a DLL-based EFT device integration enabling direct communication between EFT payment terminals and Microsoft Dynamics NAV / MDFP client environments; implemented the device communication layer, payment request handling, real-time transaction status feedback and structured error handling for a secure and reliable card payment flow.
- Engineered a PAX A35 EFT payment terminal integration for LS Central POS using AL control add-ins, delivering real-time transaction status and dependable card payment processing at the till.
- Developed C#/.NET middleware services consumed by Business Central, extending ERP capability beyond standard functionality and enabling reliable third-party system integration.
- Designed tailored reports and SQL Server–based integrations, improving data accessibility and overall system performance for enterprise users.
- Customized LS Central POS with new features, commands and event-driven API calls to streamline retail operations and support a unified in-store experience.
- Troubleshoot complex functional and technical issues across live ERP environments, working directly with client stakeholders through to resolution.

ERP Development Intern

Jan 2023 – Aug 2023

Nipuna Prabidhik Sewa Pvt. Ltd.

- Supported upgrade projects from legacy Microsoft Dynamics NAV versions to Business Central, building hands-on C/AL programming experience across real client implementations.
- Contributed to SQL Server database management and C# development alongside core ERP delivery tasks.

Trainee – Software Development

Jul 2022 – Oct 2022

TukiSoft Pvt. Ltd.

- Developed dynamic, responsive web pages using HTML5, CSS and JavaScript across front-end and back-end web development projects.
- Contributed to SQL database optimization work that improved data handling across dynamic websites.

KEY PROJECTS & TECHNICAL HIGHLIGHTS

ERP Upgrades & Migrations

- **Al Jazira** — Migrated a legacy Navision 2009 R2 system to Business Central 23, delivering a seamless data migration with improved performance and expanded platform functionality.
- **Maldives Duty Free** — Managed an end-to-end NAV 2016 to Business Central 23 upgrade, from data preparation through go-live support, ensuring system consistency and smooth user adoption.
- **African and Eastern** — Upgraded NAV 2016 to Business Central 24 and customized modules to unique business requirements while maintaining operational continuity and system integrity.
- **Mister Baker** — Executed a complex Business Central 24 upgrade with minimal downtime, unlocking the latest platform features and optimizations.
- **Nazih Trading** — Upgraded Business Central 25 to 28, developed RDLC reports and implemented a license-date driven auto-lock control.

Payments, POS & Retail Technology

- **DLL-Based EFT Device Integration (Dynamics NAV / MDFP)** — Designed and developed a .NET DLL acting as the middleware bridge between EFT payment terminals and Microsoft Dynamics NAV / MDFP client environments, covering hardware communication, payment transaction processing, transaction status management and error handling for a secure and reliable payment flow.
- **PAX A35 EFT Integration in LS Central POS** — Engineered a secure PAX A35 payment terminal integration using AL control add-ins, enabling real-time transaction status and reliable card payment processing at the till.
- **LS Central POS Customization** — Implemented new POS features and commands, including event-driven API calls and custom logic, to extend functionality and streamline retail operations.
- **LS Commerce & LS Central API Integration** — Delivered consistent communication and data alignment between LS Central POS and LS Commerce, supporting a unified retail experience.

E-Commerce & System Integrations

- **Comicave & Outmall** — Developed and implemented API integrations between Business Central and Magento, enabling real-time inventory synchronization and order processing across systems.
- **African and Eastern** — Delivered advanced API integration between Business Central and Magento.
- **Maldives Duty Free** — Extended standard BC–Magento and BC–WordPress integrations to support custom fields, improving data flow and operational accuracy.

Application Development & Automation

- **QBL Delivery Management App (Business Central)** — Led end-to-end development of a delivery management application as Senior Developer, streamlining route planning and real-time tracking to optimize logistics operations.
- **Cloudspace Mail Automation & Upgrade** — Designed automated email workflows that eliminated manual notification processes, and led the platform upgrade to the latest version to improve stability and performance.
- **Library Management System (.NET)** — Built a full-stack library management system covering cataloging, lending and reporting to streamline end-to-end library operations.

EDUCATION

B.Sc. Computer Science & Information Technology

Dec 2018 – Nov 2023

Tribhuvan University, Nepal

Higher Secondary Education (+2), Science

2016 – 2018

Janapriya Multiple Campus, Nepal
